# INDEX TO *Electron* VOLUME 1

## PART 1 • ALPHABETICAL

|  | No. & Page |  | No. & Page |
|--|------------|--|------------|
| AGC—A Concentration of Electronic Equipment.....     | 5-24       | Eliminating Radio Interference From Motors and Generators..... | 3-30       |
| Air-Search Radar Ranges.....                         | 7-21       | Emergency Modifications Permitted.....                         | 1-14       |
| A-J Receiver Sensitivity.....                        | 3-35       | Emergency Repairs to TDQ Transmitter.....                      | 3-21       |
| Aligning Link FM Receivers.....                      | 1-35       | Equipment Spares.....  | 8-11       |
| Allowances For Test Equipment.....                   | 4-38       | Error in Field Changes No. 4-WFA and No. 1-NGA.....            | 12-20      |
| AN Connectors for Frequency-Shift Keying Equipment.. | 2-40       | Error in QBE-3 Instruction Book.....                           | 5-30       |
| AN/MPN-1A Instruction Book.....                      | 3-22       | Errors in WFA Instruction Books.....                           | 12-21      |
| AN/TPS-1B Mobile Radar Unit.....                     | 3-10       |  |            |
| Anti-Hunt Control—QCU.....                           | 3-35       | Failure of 323-A Tubes.....                                    | 5-30       |
| Arc-Over in BM Equipment.....                        | 6-31       | Failure Reports—Their Use and Importance.....                  | 4-18       |
| Assembly of SC Ring Oscillator.....                  | 3-25       | Faulty 2X2 Tubes.....  | 1-20       |
| Automatic Bearing Indicator Circuits.....            | 3-26       | Field Change No. 2 For Leland Motor Generators.....            | 7-32       |
| Avoid Overcoupling SR Oscillator.....                | 1-30       | Field Engineer in the Field, the.....                          | 2-44       |
|  |            | Fighter Direction Goes High Hat.....                           | 6-14       |
| Better Performance From Your VG.....                 | 2-1        | Flash on VF PPI.....   | 6-30       |
| B.F.O. Adjustment—QCU/QCQ-2.....                     | 3-36       | Fleet Training Center on Mark 28.....                          | 5-40       |
| Bleeder Resistor Failure in QCJ-9 Sonar.....         | 2-19       | Flight Checking Radar Beacons.....                             | 4-22       |
| Bonding and Grounding of Electronic Equipment.....   | 12-1       | Flying D/F Service in the Pacific.....                         | 1-15       |
| Booby Trap.....                                      | 12-28      | FM Sonar Joins the Fleet.....                                  | 3-13       |
| Broadcast Receivers.....                             | 8-29       | Fouled Domes, Transducers, and Sea Chests.....                 | 11-6       |
|  |            | Frequency and Wavemeters.....                                  | 7-28       |
| Calculating Loudspeaker Impedance.....               | 5-32       | Frequency Change Difficulties—Model TDH-3 Transmitter.....     | 1-13       |
| Care of 2050 Tubes.....                              | 3-25       | Frequency Shift Keying.....                                    | 3-5        |
| Carrier Control Approach.....                        | 4-16       | FSA Frequency-Shift Keyer, the.....                            | 6-11       |
| Carrier-Control System With VHF Radio.....           | 10-12      | FSB Crystal Frequency.....                                     | 7-34       |
| C.E.M.B. Revised.....                                | 3-12       |  |            |
| Check Your Radar Crystals.....                       | 1-23       | GCA Spare Parts.....   | 3-48       |
| Checking and Aligning SR-2 Synchros.....             | 11-12      | German Fighter Direction.....                                  | 11-9       |
| Checking Tropicalization.....                        | 5-32       | Getting The Most Out of Your RBO.....                          | 8-12       |
| Classification of Shipboard Loran Reduced.....       | 3-36       | Give The Blower A Chance.....                                  | 3-36       |
| Classification of Sonar Recorder.....                | 10-3       |  |            |
| Classification Of Test Equipment.....                | 11-27      | Handling Fungus-Proofed Wire.....                              | 5-29       |
| Classifications Drop Again.....                      | 7-36       | Harmonic Suppressor for TDQ.....                               | 3-47       |
| Classifications Reduced.....                         | 5-32       | Height Marker Alignment In The SX.....                         | 12-21      |
| Cleaning Silver-Plated Plugs.....                    | 6-30       | Hickok Model RFO-5 Oscilloscope Modified.....                  | 1-33       |
| CNO Policy on Alterations.....                       | 9-31       | High-Frequency Direction-Finders.....                          | 8-19       |
| Color Coding.....                                    | 4-36       | Hints on the VG.....   | 2-40       |
| Components Affecting Radar Ranges.....               | 11-1       | How It's Done—Crystal Cutting.....                             | 5-14       |
| Copper Oxide Instrument Rectifiers.....              | 12-22      |  |            |
| Correct That AN/UPM-1B Antenna Error.....            | 2-20       | Improved Duplexer Type 721-B.....                              | 3-25       |
| Correcting Hunting in SP.....                        | 12-20      | Improved Operation of ST Radar.....                            | 3-37       |
| Correcting VHF Crosstalk.....                        | 5-18       | Improved Seals for SC Radar.....                               | 3-22       |
| Cosecant Squared Antennas.....                       | 6-27       | Improved TBX Antenna Mount.....                                | 5-21       |
| CVE-91 Reports YE-2 Troubles.....                    | 2-39       | Improved TR Tube.....  | 7-34       |
|  |            | Improvised TCS-15 Antenna.....                                 | 7-32       |
| DAQ Counterpoise Rods.....                           | 5-21       | Incorrect Ranges on Mark 12 Radars.....                        | 7-34       |
| DAQ Direction Finders.....                           | 1-31       | Insulation Breakdown in Mark 8.....                            | 1-31       |
| DBM Calibration Station.....                         | 5-23       | Interchangeability of Synchros.....                            | 8-20       |
| DBM-1 Incorrectly Marked.....                        | 5-29       | Interference from SJ/ST Radars.....                            | 5-24       |
| DBM-1 Radar Direction Finder Equipment, the.....     | 5-6        | Interference in Loran Receivers.....                           | 3-21       |
| DBM-1 Scope Spot Intensity.....                      | 5-32       | Intermittent Azimuth Marks on VF's.....                        | 8-18       |
| DD's Converted to Picket Ships.....                  | 4-35       | Intermittent Fading in Mark 8.....                             | 1-30       |
| Declassification of Sonar BDI Attachments.....       | 11-24      | Introducing BuShips Electron.....                              | 1-1        |
| Definition Of Gun Control Functions.....             | 11-26      | Is it Grounded?.....   | 1-14       |
| Dehydrator Instruction Books.....                    | 12-4       | Isclating Trouble in Loran Receivers.....                      | 2-19       |
| Determining Depth By Stabilized Sonar.....           | 5-1        |  |            |
| Development of ADP Crystals, the.....                | 1-10       | JT Bearing Repeater.....                                       | 4-26       |
| Directional Antennas for IFF Equipments.....         | 6-6        |  |            |
| Directional Coupler, the.....                        | 1-21       | Keep 'Em Covered—Crystals.....                                 | 5-40       |
| Disposal of Magnetrons.....                          | 8-36       | Keep Your Records Straight.....                                | 12-4       |
| Disposition of SL Antennas.....                      | 12-4       | Keeping The Sonar Driver Tuned.....                            | 4-20       |
| Down Go Classifications.....                         | 4-30       | Kinks on Links.....  | 8-25       |
| Dual Purpose Dehydrator.....                         | 5-20       | Know Your Test Equipment—OZ, OCL, OQ and OAW Series.....       | 5-18       |
|  |            | Latest Classifications.....                                    | 9-6        |
| Echo Box Data.....                                   | 9-25       | Lightweight Loran—Model DBS.....                               | 8-23       |
| Echo Box Means Better Performance, the.....          | 2-34       | Linearity Control Adjustment—SG.....                           | 4-47       |
| Echo Box Training Film.....                          | 4-38       | Loran as a Frequency Source.....                               | 4-32       |
| Electron Tube Types 2K25 and 723 A/B.....            | 2-44       |  |            |
| Electronics At The Crossroads.....                   | 10-1       |  |            |
| Electronics Division Grows UP, the.....              | 6-20       |  |            |

## PART 1 • ALPHABETICAL

|   | No & Page |  | No. & Page |
|---|-----------|--|------------|
| Loran Declassifications .....                                   | 8-24      | Old Age Pension for Maggies .....                                  | 10-22      |
| Loran Field Changes .....                                       | 5-40      | Operation of RAL Receiver on Voice Channels .....                  | 4-15       |
| Loran Streamlined .....   | 1-25      | Organization of Fleet Training Activities .....                    | 5-37       |
| Loran Questions .....   | 10-23     |  |            |
| Magic Eye Tuning For Model QGA Sonar .....                      | 2-32      | Parts Lists Soon Available .....                                   | 12-4       |
| Maintenance of Electrolytic Capacitors .....                    | 9-22      | Pass The Bad Word Along—Fill Out Those Failure Reports .....       | 4-24       |
| Maintenance of Transmission Lines and Wave Guides .....         | 2-10      | Personnel Allowances .....   | 3-32       |
| Marine Corps AA Gets A New Radar .....                          | 11-30     | Phantastron Circuit, the .....                                     | 5-38       |
| Mark 8 Mod 3—Improved Tuning .....                              | 1-30      | Popular Books Declassified .....                                   | 9-31       |
| Mark 8 Mod 3 Schematic .....                                    | 4-27      | PPI Driver Motor .....   | 3-48       |
| Mark 8 Transmitters .....                                       | 2-42      | P.P.M.—A New Technique .....                                       | 10-26      |
| Mark 12 Adjustment .....  | 5-36      | Preferred List of Army-Navy Electron Tubes As Of 1 Nov. 1945 ..... | 10-32      |
| Mark 12 Field Change No. 14 .....                               | 9-20      | Preventive Maintenance Scores Again .....                          | 3-22       |
| Mark 12 Motors .....  | 3-36      | Publications Downgraded .....                                      | 9-26       |
| Mark 13 Long Range Line .....                                   | 1-31      | Pulse Modulation .....   | 11-19      |
| Mark 13 Long Range Line .....                                   | 3-47      |  |            |
| Mark 13 Mod 0—Keep-Alive Voltage .....                          | 3-24      | QAA Portable Echo Ranging Equipment .....                          | 10-24      |
| Mark 13 Range Jitter .....                                      | 4-35      | QHA Scanning Sonar .....   | 7-12       |
| Mark 13 Scores .....  | 1-2       | QJA Training System .....  | 3-12       |
| Mark 22 Coaxial Connections .....                               | 2-42      | QJB Gyro Connections .....   | 1-31       |
| Mark 22 Field Change No. 5 .....                                | 10-3      |  |            |
| Mark 22 I-F Amplifier .....                                     | 4-12      | Radar Picket Ships .....   | 4-1        |
| Mark 22 R-F Tuning .....  | 4-27      | "Radar System Fundamentals" Now Restricted .....                   | 3-44       |
| Mark 22 Tuning at Sea .....                                     | 2-43      | Ranging With The SU Radar .....                                    | 9-18       |
| Mark 26 Mod 4—High Voltage Transformer .....                    | 5-36      | RCK Tuning System .....  | 5-9        |
| Mark 28 Mod 2 and Mark 34 Mod 2—Gun Mount Switch .....          | 1-30      | RCM Equipment .....  | 6-26       |
| Mark 28 Unstable Sweep .....                                    | 5-30      | RCU—A New Service .....  | 5-35       |
| Mark 28/34 Duty Cycle .....                                     | 5-28      | RDZ Receiver, the .....  | 3-19       |
| Mark 28/34 Duty Cycle Adjustment .....                          | 9-21      | Readiness of Equipment on Inactive Vessels .....                   | 12-11      |
| Mark 29 Mod 2 Aided Tracking Motor .....                        | 6-26      | Receiver Sensitivity .....   | 4-5        |
| Mark 32 Mod 1 Radar Equipment .....                             | 9-16      | Recent Instruction Book Distribution .....                         | 1-34       |
