
SECTION I OF 10

NAVSHIPS 94200.1

DIRECTORY
OF
COMMUNICATION
EQUIPMENT

PREPARED BY
U. S. NAVY
ELECTRONICS SUPPLY OFFICE
GREAT LAKES, ILLINOIS

FOREWORDINTRODUCTION

The Communication Directory is intended to include all separately issuable communication equipments currently in use by Naval Ships and Shore facilities. It is not, however, an equipment procurement catalog.

CONTENTS OF PUBLICATION

This publication contains the following material:

CROSS-INDEX, EQUIPMENT DESIGNATION TO FEDERAL STOCK NUMBER

This index lists the equipment designation for each equipment included, arranged in alpha-numeric sequence with the supply voltage in case it is the characteristic distinguishing two separate items, followed by the Federal Stock Number.

The letter "C" preceding the equipment designation indicates that the equipment page is classified and will be found in the classified Communication Directory.

The sequence arrangement in the first column or position is alphabetically A to Z, then numerically 1 to 9, in the second and subsequent columns, position by position, first spaces, then dashes, then alphabetically A to Z and numerically 0 to 9.

GLOSSARY OF ABBREVIATIONS

NAVSHIPS 94200 contains the abbreviations and symbols used in the directories.

EQUIPMENT CATEGORY CLASSIFICATIONS

A list of categories of equipments for which directories have been prepared:

1. COMMUNICATION

- 1.1 Antennas
- 1.2 Auxiliary
- 1.3 Navigational Aids
- 1.4 Receivers (including d/f not used for CM)
- 1.5 Communication Terminal Equipment
- 1.6 Transmitters
- 1.7 Transceivers

2. RADAR

- 2.1 Detection
- 2.2 Height Finding
- 2.3 IFF-Identification and Recognition
- 2.4 Data Relay and Distribution
- 2.5 Display
- 2.6 Navigation (includes local and remote installations)
- 2.7 Missile Guidance
- 2.8 Trainers
- 2.9 Auxiliary

3. SONAR

- 3.1 Echo Ranging
- 3.2 Listening
- 3.3 Fire Control
- 3.4 Communication
- 3.5 Depth Determining
- 3.7 Bathythermographs
- 3.8 Harbor Defense
- 3.9 Trainers
- 3.10 Auxiliary and Special

4. TEST

- 4.1 Voltage and Current Measuring
- 4.2 Frequency Measuring
- 4.3 Wave Form Measuring
- 4.4 Signal Generating
- 4.5 Field Intensity Measuring
- 4.6 Impedance and Standing Wave Ratio
- 4.7 Amplifying

- 4.8 Time Base Measuring and Counting
- 4.9 Nuclear Energy Measuring
- 4.10 Combination and Group
- 4.11 Associated Devices
- 4.12 Miscellaneous Test
- 4.13 Calibrating
- 4.14 Power Measuring

- 5. RADIAC
 - 5.1 Survey
 - 5.2 Dosimeters (including chargers and readers)
 - 5.3 Monitors
 - 5.4 Laboratory Equipment

- 6. INFRARED
 - 6.1 Communication
 - 6.2 Search
 - 6.3 Laboratory Equipment

- 7. COUNTERMEASURES
 - 7.1 Auxiliary
 - 7.1 (Mine Detectors)
 - 7.2 Direction Finders
 - 7.3 Jammers
 - 7.4 Panoramic Adaptors
 - 7.5 Pulse Analyzers
 - 7.6 Receivers
 - 7.7 Recorders
 - 7.8 Deception Devices

- 8. METEOROLOGICAL
 - 8.1 Automatic Weather Station
 - 8.2 Atmospheric Sounding
 - 8.3 Cloud and Storm Detection
 - 8.4 Auxiliary

- 9. INDUSTRIAL
 - 9.1 Material Processing
 - 9.1 (Photo Equipment)
 - 9.2 Plant and Machinery Instrumentation
 - 9.3 Warning and Safety Devices
 - 9.4 Product Development Instruments

9.5 Quality Control Instruments

FUNCTIONAL SUITABILITY CLASSIFICATION

Definitions of Functional Suitability Classification used in this Publication:

STANDARD (Std)

Classification denoting the most advanced and satisfactory equipments approved for service use - these are preferred for procurement.

SUBSTITUTE STANDARD (Sub Std)

Classification denoting those equipments approved for service use which do not have as satisfactory military characteristics as STANDARD equipment - when necessary, may be procured to supplement the supply of STANDARD equipments.

LIMITED STANDARD (Ltd Std)

Classification denoting those equipments approved for service use which do not have as satisfactory military characteristics as STANDARD or SUBSTITUTE STANDARD equipments, but are useable substitutes - complete major units will not be procured, but component parts, accessories and complementary articles, even though they too may be LIMITED STANDARD equipments, may be procured if necessary, and economical, to maintain complete major units in serviceable condition throughout a reasonable life expectancy.

OBSOLESCENT (O)

Classification denoting those equipments which no longer have satisfactory military characteristics but which must be continued in service pending availability of improved replacements - component parts, accessories, and complementary articles will normally not be procured for the specific purpose of maintaining this equipment. Spare parts common to other equipment in the Supply establishment may be used, however, for their maintenance.

OBSOLETE (Obs)

Classification denoting those equipments which have been declared unsuitable for their original military purpose - disposal of stocks of OBSOLETE equipment will, in all cases, be expedited.

PLANNED STANDARD (Pln Std)

Classification denoting those equipments under evaluation or consideration - approval for service use and classification is required for equipments in this category prior to installation.

USED BY

Certain items of equipment are not listed by a particular service as carrying any of the specific status designations in a through c above. However, in some instances, it is known that certain quantities of the equipment are in use at installations under the control of that particular service. These items are designated as "Used by" under the type classification of the service involved.

EQUIPMENT DATA SHEETS

The equipment data sheets are assembled alpha-numerically by equipment designation. Each data sheet contains a functional description, an illustration (when available), technical description, relationship to similar equipments, physical description, reference data. Federal Stock Number, manufacturer and other related information.

GENERAL INFORMATION

The "W/S" following the Federal Stock Number in the cross-index indicates an equipment with spares (W/S).

All classified communication equipments are included in a separate classified Communication Directory.

Throughout this publication, Federal Stock Numbers are given when available.

PUBLICATIONS SUPERSEDED

This directory supersedes the Navy Stock List Equipment Section data sheets, for the Equipment Category Classification Radio Section (1) in its entirety.

All inquiries concerning distribution or comments regarding discrepancies found within the contents of this directory should be referred to:

Chief, Bureau of Ships
