33 TELETYPEWRITER

(Teletypewriter Forces)

1. All future shipments of 33 ASR Sprocket Feed machines (Plan 284) will be equipped with TP-183128 and TP-182290 modification kits.
2. Western Electric will deactivate the TP-183128 X-on feature as follows: Remove the orange lead from the terminal, tape and fasten it to the rear of the stunt box. A sticker will also be affixed denoting that this is a tariff item.
3. To activate when called for on the service order proceed as follows:
 - A. For the TP-183128 X-on feature, replace and solder the orange lead to the terminal of the X-on contact.
 - B. For the TP-182290 discrete TD call in feature, code the function bar as required.
4. Retain this letter until canceled.
