

MEMORANDUM FOR THE RECORD

DATE: 10/10/1963

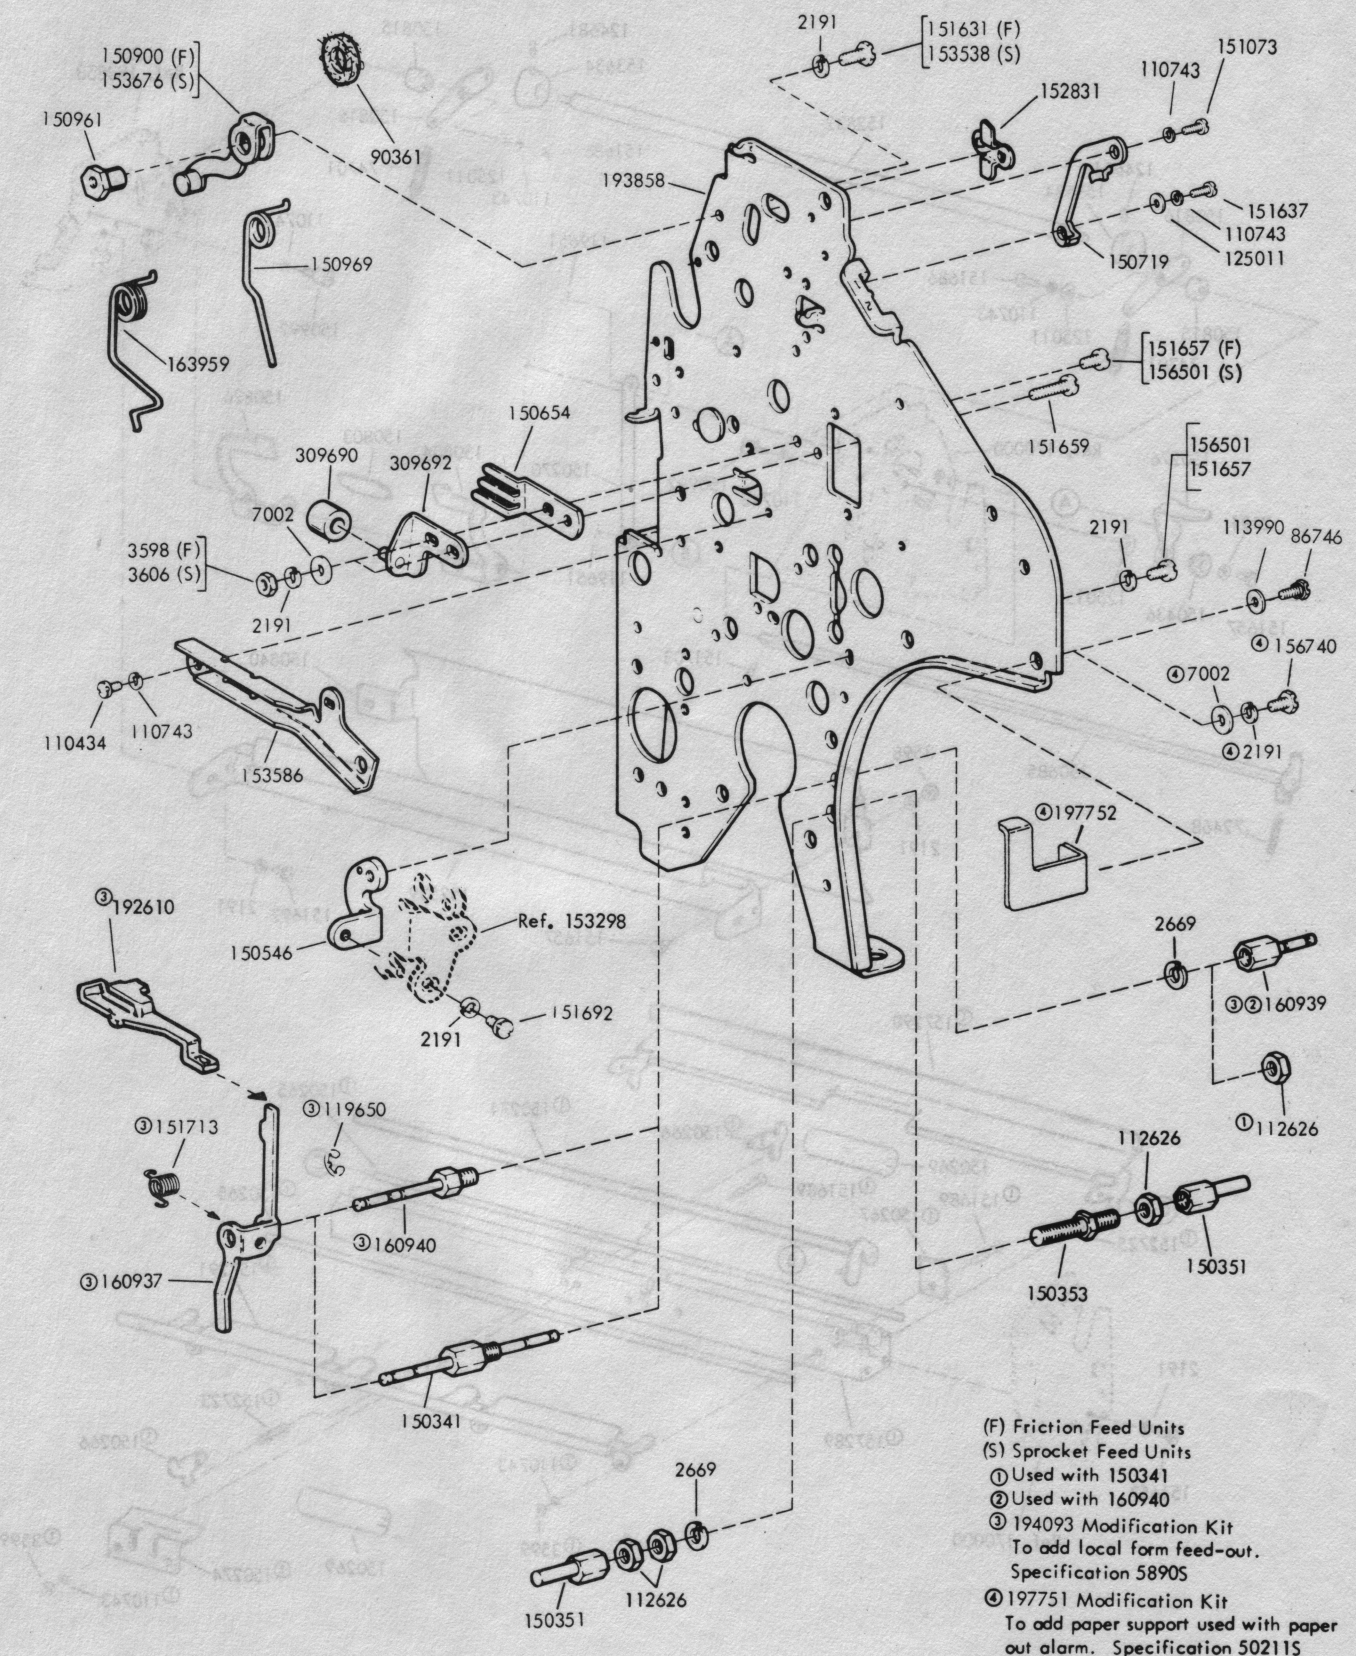

[The body of the memorandum contains several paragraphs of text that are extremely faint and difficult to read. The text appears to be a formal report or summary, but the specific details are illegible due to the low contrast of the scan.]

FIGURE 1. EATING AND NOT EATING FOOD (EAT/NOT EAT)

FIGURE 1. CROSS SECTION

(F) Friction Feed Units
 (S) Sprocket Feed Units
 ① Used with 150341
 ② Used with 160940
 ③ 194093 Modification Kit
 To add local form feed-out.
 Specification 58905
 ④ 197751 Modification Kit
 To add paper support used with paper
 out alarm. Specification 502115

Figure 10. Hippocampal NMDA receptor subunit distribution. *A*, *B*, *C*, The distribution of NR1, NR2A, and NR2B subunits in the hippocampal region. The subunit distribution is shown as a schematic diagram of the hippocampal region with various subfields labeled. The distribution of each subunit is indicated by black dots and lines, showing their relative concentrations across the different subfields. Scale bar, 1000 μ m.

FIGURE 10. 10% DISCOUNT BICYCLES COMPANY, INC., BICYCLE FRAME AND ACCESSORIES

Figure 10. Schematic representation of the APP structure and its processing. The APP protein is shown in the top section, and the different fragments generated by the cleavage of APP are shown in the middle and bottom sections. The APP protein is cleaved by BACE1 and BACE2 into different fragments, and by alpha-secretase, beta-secretase, and gamma-secretase into different fragments. The APP protein is also cleaved by alpha-secretase, beta-secretase, and gamma-secretase into different fragments. The APP protein is also cleaved by alpha-secretase, beta-secretase, and gamma-secretase into different fragments.
