INTRODUCTION

Bulletin 327B provides general and specific technical information for the 2101AA INKTRONIC Page Printer, Receive-Only (RO), and its component units. This bulletin covers description and principles of operation; installation; checkout and troubleshooting; adjustment and lubrication; disassembly and reassembly; and removal and replacement of components.

The bulletin is made up of a group of appropriate independent sections. The sections are complete within themselves; they are separately identified by title and section number and the pages of each section are numbered consecutively, independent of other sections. The identifying number of a section, a 9-digit number, appears at the top of each page of the section, in the upper left corner of left-hand pages and the upper right corner of right-hand pages.

To locate specific information refer to the table of contents on the following page. Find the name of the involved component in column one and the title of section in column two. The correct 9-digit section number will then be found in column three. The sections are arranged in the order shown in the table of contents. Turn to page one of the section indicated where the contents of that section will be found (except where a section is small and does not require a listing of contents).

The sections comprising this bulletin are now stocked separately and may be individually ordered if the entire bulletin is not required.

TABLE OF CONTENTS

<u>Equipment</u>	<u>Contents</u>	<u>Section</u>	<u>Issue</u>
INKTRONIC Page Printer Set (RO)	General Description and Operation	592-820-100TC	2
Recorder and Paper Transport	Description and Principles of Operation	592-820-110TC	2
Electronic Circuits	Description and Principles of Operation	592-820-111TC	2
Enclosures and Paper Handling	Description and Principles of Operation	592-820-112TC	2
INKTRONIC Page Printer Set (RO)	Installation	592-820-200TC	2
